Note to patients:

The first visit with us is typically a consultation where we will review your clinical and radiographic findings and develop a treatment plan. • Please bring this referral slip with you. Other patient forms are on the website and can be filled out there at your convenience. • Please bring a complete list of your current prescription and over the counter medications. • If you are on a blood thinner or have a significant medical history, please contact your physician's office for management issues several days before your appointment with us. • If you require antibiotic premedication before dental procedures, please take that before you arrive for a surgical appointment. • Payment is expected at the time of services. Most major credit cards are accepted and we participate with Care Credit.
